Abstract

This is the interim website for Erie Looking Productions that is maintained as a L^AT_EX2e document and posted via LaTeXML. A downloadable print version of this site [is available](#).

0.1 Switching Servers

For now this is a L^AT_EX₂ε document exported using LaTeXML to being a webpage. This will be expanded eventually. We have been on hiatus for far too long. For now we must remain that way. This will eventually change.¹

This site is being hosted on a \$5 Digital Ocean droplet for the time being. The site was previously hosted by LISHost. I want to thank Blake Carver for hosting things for as long as he did. Right now I'm trying some very, very experimental things on this droplet and I do not want to break Blake's servers **again**.²

Versioning will eventually be implemented on this as soon as the new breezy version control system starts to stabilize a bit. Currently work is underway on properly utilizing a Gogs server set up using the simple gogsgit snap. I do not intend to version this site on GitHub.

Work may take place on using feed2exec to watch my RSS feeds.³  This may be utilized in conjunction with Offline IMAP as well as NOAA FTPMail due to how inconsistent network access is becoming locally. Even the Emergency Manager Weather Information Network, or EMWIN, could prove useful as things deteriorate locally to where I'll be reading UUCP Mail Interchange Format Standard (1986) as I also have Using & Managing UUCP on the shelf. Don't get me started on satellite reception as well as over-the-air television...

0.2 Where is the blog?

Presently the blog is stashed at <http://skellat.freeshell.org/blog>. The blog is maintained using Pelican. The original inner-workings are stashed on Launchpad but it isn't as if that is the cool thing anymore. Migration will come when I am ready and able to set up sufficient redirects over at SDF.⁴

0.3 Is there more out there?

Yes, you can consult my presence on GitHub as well as on Launchpad as well as many places I have yet to tell you about. The old podcasts that have been archived are available at <https://archive.org/search.php?query=%28erie+looking+productions%29+AND+mediatype%3A%28audio%29&sort=-date>. The Gogs instance isn't fully up and running yet at <http://git.erielookingproductions.info> and still needs HTTPS set up yet.

¹Even though I finally reached "journey level" in my job it is still not on a sure footing. I can be without pay at any time.

²There was an ill-fated brief run at implementing a StatusNet server back in the day before StatusNet morphed into being GNUSocial. That broke things as I didn't set it up right.

³I am having trouble figuring out how to get feed2exec to create any output currently.

⁴It may have to stay there since it is referenced too often elsewhere.

0.4 The Dam Short Film Festival

If I manage to make a timely entry in the [Dam Short Film Festival](#) in Boulder City, I will be surprised. There is an idea. I will need to take advantage of the [screenplay package on CTAN](#) to try to whip something up. We have some recording resources. This might actually work.

There hasn't been anything produced of significance under this branding for a while. That needs to change. There is an extremely rough idea for a short film that would be "ripped from the headlines" but from very obscure headlines.⁵ Then again, I have been watching too many films on [RiffTrax](#) that present strange ideas to build off.⁶

0.5 Religious Works

As part of church activities I do participate in our Domestic Mission Field Activity at West Avenue Church of Christ. Currently we provide full services at Saybrook Landing Nursing Home. I do quite a bit of preaching and the prep work for our twice-a-month visits. A draft copy of one of our service booklets is attached.  The church does not have much of a web presence but I am working on that.

Currently I am not providing support services to the Music Along The River festival either as Clerk or Chaplain. With changes to the coordinating committee, this is not expected to change. A registration entry was submitted to the Ashtabula County Emergency Management Agency **by direction** to offer religious care services on behalf of the congregation during emergencies if needed.

⁵"Political Row Makes Europe Clocks Go Slow," *BBC News*, March 7, 2018, sec. Europe, <http://www.bbc.com/news/world-europe-43321113>.

⁶Frankly, I want to avoid excessive establishing shots. However, doing that with narration on top may actually be a useful plot device.
